

Team Working Agreement

Decision Making – Consensus, voting when necessary. Most decisions thus far have been reached by consensus, and the only vote that was taken was for the Project Logo, which was unanimous anyway.

-Team meetings – Decided using When2Meet on a weekly basis. Team has varying schedules week on week, so this is the best as opposed to a set meeting time.

-Team keeps team accountable. We will use group accountability and help remind each other of deadlines.

-Thus far, we have been planning for a few extra days at the end of each sprint just in case things were missed. In Sprint 0, a few items were missed, but we had a few days clear things up.
