

Test Cases

Test ID	AC Ref	Test Name	Input / Setup	Expected Result	Type
TC-01	AC-01	Free text to constraints	chat = 'no classes on Fridays, prefer online, evenings only'	Output contains RequiredDaysOff=Friday, PreferredInstructionMethod=Online, PreferredTime=Evening	Automated
TC-02	AC-02	Priority reflects language intensity	chat = 'I absolutely need Fridays off but evenings would be nice'	Friday constraint has higher priority than evening constraint	Manual
TC-03	AC-03	Multiple preferences from one message	chat = 'more math focused, no class on Tuesdays, interested in AI'	Three separate preference entries extracted	Automated
TC-04	AC-04	Transcript course extraction	Upload sample_transcript.pdf containing CS505, CS604, CS608, CS610, CS612, CS623	All six codes appear in completed_courses	Automated
TC-05	AC-05	Remaining course not marked complete	Upload sample_transcript.pdf where CS691 is listed as remaining	CS691 does not appear in completed_courses	Automated
TC-06	AC-06	Transcript as object decoded	POST with transcript as {data: 'data:application/pdf;base64,...', name: 'transcript.pdf'}	completed_courses contains course codes from the PDF	Automated
TC-07	AC-06	Transcript as bare string decoded	POST with transcript as a plain base64 data URL string	completed_courses contains course codes from the PDF	Automated
TC-08	AC-07	Output validates against schema	POST a complete request with all fields	Response parses as a valid StudentPlanRequest	Automated
TC-09	AC-08	Form values override chat	POST with degreeLevel=Graduate in form, chat says 'im an undergrad'	Response level = Graduate	Automated
TC-10	AC-09	Constraint types use exact vocabulary	chat = 'avoid in person classes, no Thursdays'	Output uses AvoidInstuctionMethod and AvoidDays (exact DB spelling)	Automated
TC-11	AC-10	Constraint values match DB format	chat = 'keep Mondays and Wednesdays free'	Output value is 'Monday, Wednesday' matching DB comma-separated format	Automated
