

Persona 1

Student

William Court, 24
Computer Science Major

As a student, he often struggle to identify which courses to take each semester while balancing coursework, jobs, and personal commitments. IAPO analyzes a student's completed coursework, target graduation date, and preferred credit load to generate an optimized, conflict-free schedule, giving them a clear path to on-time graduation and the ability to explore "what-if" scenarios before registering.

Problems:

- Prerequisite planning confusion
- Unclear degree requirements
- Work-life-study balance

Goals:

- Graduate on time
- Explore course scenarios
- Balanced course schedule
- Maintain target GPA
